A Rehabilitation Research Study for People with Leg Amputation

Do you want to help reduce disability after leg amputation?

The University of Colorado Rehabilitation Sciences Program is looking for people who:

• Had an amputation more than one year ago
• Have Diabetes, Peripheral Artery Disease, or Peripheral Vascular Disease
• Can walk with a prosthesis
• Are 45 to 88 years old

If you or someone you know would like more information regarding this research study, please contact us!
